

## Echo Contest

For 2 performers separated by a distance.

Step 1: Performer A must create a sound that can be heard by Performer B.

Step 2: Upon hearing this sound, Performer B must try to find the direction from where the sound is coming and make the distance between the 2 performers smaller. Performer B must then to best of their ability, mimic the sound of Performer A in a way that Performer A can hear it.

Step 3: Upon hearing the mimicked sound of Performer B, Performer A must make the distance between the 2 performers greater and must recreate exactly to best of their ability, the sound of Performer B in a way that Performer B can hear it.

Repeat Steps 2 and 3 until Performer B finds Performer A.
